

11 November 2014

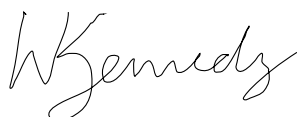

Dear Ross Bagpipes,

As per our product testing, I have successfully found a pipe bag that would give the most in terms of quality, performance, and feel. During my research on the best pipe bags out in the market, I have come upon a lot of options to choose from. While most of them were great, I have found the perfect pipe bag for the band's needs. I found that the new Ross Leather Bag is the best in terms of meeting all the qualifications that we require to reach our maximum potential.

The Ross Leather Bag is clearly made with the best materials available, product development and offered at a competitive rate. St. Andrew's Pipe Band have been fortunate to be early testers of this new product, and we have not been disappointed with the product, or the service of Ross Bagpipes. I have found, and had many comments made by others in the band, that this product pushes the mark when it comes to stability, feel and quality of workmanship in the Ross Bagpipes range.

I look forward to the band taking advantage of the Ross Leather Bag and Ross Moisture Control system in our efforts to compete against the best in the world at the 2015 World Pipe Band Championships. I am certain we will have superior control on our moisture and consistency throughout the band to meet the conditions of Australia, and Scotland.

Yours sincerely

Wayne Kennedy
